Enterprise Case Study

DisplayNote Launcher redefines meetings at Weber – improving productivity and collaboration.

DisplayNote **Launcher**

Introduction.

Headquartered in Breidenbach, Germany, Weber is the global leading system provider for sliced products in the food processing industry.

The company has a worldwide reputation as a high-tech company and has been setting new standards within the industry since 1981 with innovation and know-how. Weber has 1400 employees based in 20 countries.

The Problems.

As a worldwide organisation, Weber operates across 24 locations and 20 countries. Weber's market is changing at an incredibly high speed so maintaining a high standard of communication and collaboration internationally is crucial to their continued success.

Weber recognised the need for an innovative solution to enhance and simplify the meeting experience across their business headquarters, to improve team collaboration and help increase productivity within their meeting spaces.

DisplayNote Launcher

“

Launcher is used every day. The ability to quickly share 3D models of our machines makes it easy to show colleagues complex information no matter where they are in the world.

The Solution.

1 of 2

After exploring various options, the Weber team chose DisplayNote Launcher to install in its headquarters. By using Launcher in 10 separate meeting spaces, Weber now benefits from technology that simplifies how employees share, connect and collaborate.

With Launcher installed on meeting screens, attendees can launch apps, access content and calendars, and start video calls with one touch.

It was an easy decision for us. With an easy to operate user-interface and multiple additional features like wireless casting, users at all levels of our business are collaborating better than ever before.

The Solution.

2 of 2

Meeting attendees use their smartphone to:

- create a secure, personalised touch screen experience;
- provide instant access to their content, calendars and calls;
- initiate Microsoft Teams or Skype for Business.

All without the need to sign in or interact with the main display.
